

# MONARCH

## SALT CHLORINATOR

### Product

## Monarch Salt Chlorinator

### Description

This leading salt chlorinator offers a modern alternative to handling chlorine... complete with self cleaning cell this unit produces chlorine via a supply of salt initially distributed within the pool. The digital display on the control panel tells you when a salt top up is required, very easy to use, simple.

# MONARCH

## SALT CHLORINATOR

### CONDITIONS FOR OPERATION

- Voltage rate: 230v 50 Hz.
- Maximum working pressure 2 bars.
- Installation handbook supplied with each unit.

The Monarch Pro Matic E-Series of Salt Chlorinators is designed to manufacture chlorine in your plant room – no more carrying drums of heavy chlorine!

Once you have had your unit installed – add the recommended level of salt (3gms per litre) to your pool water at the inlet return and let it disperse – Turn on your Pro Matic. As the pool water passes through and over the titanium cell chlorine is produced under controlled conditions.

As the level of salt slowly dilutes out of the pool water an electronic warning is given telling you to add more. Generally salt top ups are required twice a year.

"Taste", a question often asked... the low level of monitored salt in the water releases a 'very' mild and pleasant taste not that different to a tear drop.

You will also find that algae will be a thing of the past – and when returning from your holiday you will find the water as hygienic and sparkling as when you left it.

Easy to follow installation and operating manual.

The revolutionary ESC Series requires only 0.3% (3000 ppm) salt and has an intelligent self-clean cell system. This eliminates the need for manual cell cleaning providing virtual maintenance free operation. There are currently 4 standard models to suit all private pools.

Heavy calcium areas will require cell to be cleaned periodically.

### ADVANTAGES

- Most Efficient and Economical Pool Sanitising System.
- No handling or storing of Chlorine
- Environmentally friendly. Salt is a natural product
- Fully Automatic, safe and simple to use
- Non Irritating to skin and eyes
- Sparkling clear pool water
- Mild salt water has therapeutic benefits
- Suitable for all pool surfaces.
- Low salt and overload Indicators
- Winter switch for cold water operation

### SPECIFICATION

The Monarch is available in 3 sizes.

- **BZc ESC16 Self Cleaning Unit** for pools up to 17,500 gallons imp  
51cm x 18cm x 36cm – Weight 12kg
- **BZc ESC24 Self Cleaning Unit** for pools up to 25,000 gallons imp  
51cm x 18cm x 36cm – Weight 12kg
- **BZc ESC36 Self Cleaning Unit** for pools up to 32,000 gallons imp  
51cm x 18cm x 36cm – Weight 14kg
- **BZc ESC48 Self Cleaning Unit** for pools up to 40,000 gallons imp  
51cm x 18cm x 36cm – Weight 14kg
